WRITTEN LANGUAGE

This LIFEPAC® contains a story that tells how important it is to feel needed and wanted. The activities will help you to understand the story.

You will learn something about the history of the English language, how to improve your reading and study skills, and how to make a written report.

Stories using your new spelling words and helpful handwriting exercises will add to your LIFEPAC enjoyment.

Objectives

Read these objectives. The objectives tell you what you will be able to do when you have successfully completed this LIFEPAC. Each section will list according to the numbers below what objectives will be met in that section. When you have completed this LIFEPAC, you should be able to:

1. Select the main idea of a paragraph or a story.
2. Give details of a story.
3. Put the events of a story in the order in which they happened.
4. Write a simple outline.
5. Define words by the way they are used in sentences.
6. Tell the moral lesson of a story.
7. Define new words.
8. Name Greek and Latin roots and “borrowed words” from other languages.
9. Write a report.
10. Write lowercase letters.
11. Spell new words.

1. LANGUAGE

The first story in this unit is about a boy your age who had some special friends and a unique problem which his entire family helped to solve. Also, in this section you will learn about the history of some of the English words you use every day.

You will learn to spell some new words.

Objectives

Review these objectives. When you have completed this section, you should be able to:

1. Select the main idea of a paragraph or a story.
2. Give details of a story.
3. Put the events of a story in the order in which they happened.
6. Tell the moral lesson of a story.
7. Define new words.
8. Name Greek and Latin roots and “borrowed words” from other languages.
10. Write lowercase letters.
11. Spell new words.

Vocabulary

Study these vocabulary words. Learning the meanings of these words is a good study habit and will improve your understanding of this LIFEPAC.

philology (fu lol u jē). Study of language or words.

source (sôrs). The beginning of something.

unabridged (un u brijd). Complete. Not shortened.

Note: All vocabulary words in this LIFEPAC appear in **boldface** print the first time they are used. If you are unsure of the meaning when you are reading, study the definitions given.

Joey and the Sad Tree (Part One)

Joey Prince was a very happy young man because he had many special friends—four squirrels, two rabbits, and many colorful birds that visited the bird feeder daily. In the large yard were thirteen trees of various sizes.

At mealtime each day, Joey and his family fed the birds, squirrels, and rabbits. Someone also refilled the water container every day. The family gave the squirrels nuts and crackers. Sometimes, as an extra treat, Mrs.

Prince spread peanut butter on the crackers. The rabbits were given lettuce and carrot tops, which they loved. The birds were fed birdseed and bread crumbs.

Joey's special friends thanked Joey and his family in ways that delighted everyone.

The rabbits hopped around and ate within arm's reach of family members. Sometimes the squirrels sat on Joey's lap to eat their food, and the birds often rested on his shoulders. Sue, Joey's younger sister, often played in the yard while the rabbits and birds ate nearby. Squirrels took nuts from Sue's hand. These wild animals came near to the people in Joey's family because they trusted them.

One day while playing in the yard, Joey noticed that one tree seemed to have a sad look on its trunk. He ran into the house to tell his mother.

Mother went into the yard to see for herself.

"Yes, Joey, that tree looks unhappy. We must find the reason why it is sad."

When his older sister, Liz, came home Joey showed her the sad tree, too. "I'll think about how we can make it happy again," she said.

Joey and his family loved their home and all the little animals that lived nearby. They were a happy family, who shared their thoughts with each other. If something troubled one of them, the rest knew about it. They sat down together and talked over their problems. They had learned that they could solve most of their problems together.

That night after dinner the family went into the living room to talk about the sad tree. Liz was the first person to enter the conversation.

“Let’s build a seat around the tree so we can sit under its branches,” she suggested.

“Liz, that is a good idea,” Joey remarked. He looked at his dad. “What about that idea, Dad?”

“I think that is a good idea, but why not build seats around all the trees that don’t have swings hanging from them? I’ll need help to build them,” he answered. Sue, Joey’s younger sister, added, “I know I can help by holding nails and running errands.”

The family also agreed that they would observe the tree and its surroundings together to see if they could find a reason for its sadness.

The next morning Joey went into the yard. He sat for a long time watching the tree, the birds, and all of the animals in the yard. Finally, he noticed some things which gave him a clue. He couldn’t wait to tell his family.

(to be continued in Section Two)

Choose the correct answer.

- 1.1** Put an X in front of the sentence that best describes the story.
- _____ We should do what we can to help make anyone who is sad become happy.
 - _____ Joey is a happy boy.
 - _____ A sad tree is in Joey's backyard.

Development of The English Language

You learn new words every day. When you hear a new word, do you ever think about the English language? How did the language get so many words? How did our language get so many different spellings? How did the English language get so many different sounds for the same spelling endings, such as *food*, *good*, and *blood*?

The alphabet has twenty-six letters. How can a language with an alphabet of 26 letters have more than one million words? If you're wondering about the answers to these questions, think about this fact. The 26 letters of our alphabet have 44 sounds, but those 44 sounds have 256 different spelling combinations!

Thousands of words in English are formed from old Greek and Latin roots. The Greek root *graph*, meaning *writing* or *drawing*, has hundreds of English words stemming from it. The Latin root, *audio*, meaning *to hear*, also has hundreds of English words stemming from it.

Greek and Latin do not account for all of the different words and spellings. The English language has “borrowed” words from many other languages. English “borrowed” such words as chocolate and banana from the Spanish; moccasin from the American Indian; chop suey from the Chinese word, *tzop-suey*; confetti from the Italian; and chauffeur from the French. These examples are only a very few of the “borrowed” words in the English language.

An **unabridged** dictionary is helpful for finding the source of words. The source will help you to understand why sounds are spelled differently—one way in one word and another way in another word. As an example, the *sh* sound has fourteen different spellings. Two words with the *sh* sound are ship and sugar. The *sh* sound in sugar is spelled without the *h*. The *sh* sound in ship has the *h*.

The word *ship* came to the English originally from the German. They called it *schiff*. The Danish added the word to their language and pronounced it *skib*. The Icelandic language spelled it *skip*. The Dutch added the word to their language and spelled it *schip*. The word then came into the Anglo-Saxon language and was spelled first as *scyp* and later as *scip*. Modern English seems to have combined several of the spellings and pronunciations of other languages to arrive at the present word, *ship*.

The word *sugar* traveled halfway across the globe before it came to England. Sugar originally was called *carkara* in India. The word moved west to Asia Minor and became *sakkar* in Arabia. Sakkar moved to southern Europe, to Spain, and became *azucar*. Moving north to France, the word became *sucre*. In Middle English the word became *sugre*. *Sugar*, in modern English, seems to have combined the beginning letters of Middle English and French with the ending letters of Spanish, Arabic, and Indian.

Fill in the blanks with words from the list. Each sentence below has a word missing. If you are in doubt about the meaning of any word, look the word up in a dictionary.

1.38

You have been reading about language and the alphabet. *Alphabet* comes from the Greek words *alpha* and *beta*, the names of the first two letters in the Greek alphabet. *Language* comes from the Latin word, *lingua*, which means *tongue*.

One reason why the English language has so many words is the frequent use of compound words. Some compound words are combinations of words from two different languages. Today, many people use a computer or typewriter to print messages. The word *typewriter* is an example of a compound word. *Type* is originally from Greek and Latin words that came into the English language. *Writer* is from an old Anglo-Saxon word. Two words from different backgrounds have formed a compound modern English word, *typewriter*.

Write compound words in the blanks. Add a word from the second column to a word in the first column. The words formed are compound words.
